

FATIMAH BINTI AMIN

Bachelor of Mechanical Engineering (Hons)

fatimahamin840@gmail.com | +60118570375 | Tawau, Sabah

CAREER OBJECTIVES

Final-year Bachelor of Mechanical Engineering (Hons.) student at Universiti Teknikal Malaysia Melaka (UTeM), expected to graduate in November 2026. Passionate about mechanical design, product development, engineering analysis, and manufacturing processes, with practical experience gained through internships at Jabatan Kerja Raya (JKR) Sabah and SD Guthrie Merotai Palm Oil Mill. Proficient in engineering software including CATIA, AutoCAD, ANSYS, SolidWorks, Microsoft Excel, and Microsoft Office. A fast learner with strong analytical thinking, communication, teamwork, and problem-solving abilities, committed to delivering high-quality engineering solutions. Available to start work in September 2026.

WORK EXPERIENCE

Internship, Jabatan Kerja Raya Sabah based in Tawau

July 2025 – Sept 2025

- Assisted engineers in mechanical maintenance and infrastructure projects.
- Conducted site inspections for government buildings and mechanical systems.
- Prepared Bills of Quantities (BQ), technical reports, and project documentation.
- Assisted in evaluating HVAC, plumbing, fire protection, and water supply systems.
- Participated in meetings, project coordination, and progress monitoring.
- Learned government engineering procedures, specifications, and project management practices.
- Collaborated with engineers, contractors, and consultants to ensure project requirements were achieved.

Internship, SD Guthrie Sdn Bhd, Merotai Palm Oil Mill

April 2021 – September 2021

- Assisted engineers and technicians in preventive and corrective maintenance activities.
- Performed routine inspections to identify equipment faults and improve operational reliability.
- Followed workplace safety regulations and standard operating procedures (SOPs) to ensure a safe working environment.
- Gained practical experience in the maintenance and troubleshooting of palm oil processing equipment, including boilers, turbines, pumps, compressors, and centrifuges.

EDUCATION

Bachelor of Mechanical Engineering (Honours)

Oct 2022 – Nov 2026

Universiti Teknikal Malaysia Melaka (UTeM)

Diploma in Mechanical Engineering

June 2018 – Sept 2021

Politeknik Mukah Sarawak (PMU)

PROJECT

Integrated Design Project – WaveClean Pro Ultrasonic Dishwasher

June 2025

- Designed an innovative ultrasonic dishwasher to improve cleaning efficiency while reducing water and energy consumption.
- Conducted engineering design analysis and structural simulation using ANSYS.
- Prepared engineering drawings and product design using AutoCAD.
- Applied sustainable engineering concepts to enhance hygiene and operational performance.
- Presented the project at the university innovation competition and received the Gold Award.

Final Year Project- Effect of Adding Bismuth Oxide (Bi₂O₃) on the Physical and Mechanical Properties of Recycled PET as a Biodegradable Agent

July 2026

- Investigated the effects of different Bi₂O₃ concentrations on recycled PET.
- Conducted density, hardness, tensile, and soil burial tests.
- Examined material morphology using a Dino-Lite digital microscope.
- Presented research findings through technical reports and presentations.

SKILLS

Technical Skills

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Catia
- SolidWorks
- ANSYS

Professional Skills

- Time Management
- Teamwork
- Leadership
- Problem Solving
- Communication
- Critical Thinking

Additional Tools

- Canva
- AI tools
